About This Game

You may think you know your limits – what evils you might be willing to commit to save yourself.

Are you ready to find out what you are capable of? Are you brave enough to face the darkness in your soul?

Not only are the old stories true, but the things that crawl in the shadows are more wretched than you could have ever imagined.

The whispers of the northern woods pick at your sanity. Your fingers tremble as you light your final match, body shivering from dread. Do you sense them hunting for you? Can you feel them hunger for your last breath?

You can feel his eyes on you, sitting at the water's edge, watching as he plays his infernal violin...

When you cross the line and enter that unforgiving place, what will you do to save yourself?

Can you even be saved?

All the stories being told to scare children are actually true. The Swedish folklore is real and it's coming for you! Unforgiving - A Northern Hymn is a first person horror game heavily inspired by Swedish folklore and the Nordic mythology to create the nightmares that's been haunting Swedish children for many generations.

Featuring:

- Traditional Swedish environments filled with some of the most famous creatures from Swedish folklore.
- Intelligent AI choosing its own paths instead of patrolling on the same routes over and over.
- 4K support.
- Joy for explorers with open world areas and plenty to discover and inspect.

Be warned!

This game contains gore, violence, nudity and strong language! Hope you enjoy!

This game..... damn this game and it's jump scares. A really good short game and gets you jumping most of the time. A lot of crazy stuff happens during your gameplay and it works well together.. I would definitely recommend this game! Nice story, and also good atmosphere! The game got me some times, so I can tell the jumpscars are very good. I would recommend bying it when its on sale (I got 90% off).

> So all in all a good and short horror game, with a nice atmosphere and a good storyline.. I love me some swamps and trolls. I always found them bogs mesmerizing, bumped into these while being a little bit lost in the forest with my friend a couple of times. That's even creepier in real life, even during daytime and without them monsters. But, sadly, even a swamp can't salvage this gameplay, which exhausted me in less than an hour. Basically, you tediously run around collecting stuff to move the plot, sometimes things happen, just like in that slenderman trash. The things themselves are okay, Swedish folklore is much better than them spooky urban memes, and the price is real low, but none of it could justify the slog to me.. Well,i just completed the game and it feels like i watched the good movie,sounds are great they just forcing you to look around and be warned. Over all 9/10
