

---

The Hitman Absolution is not an easy game to play. A player can die in a flurry of bullets with no time to react-- especially on the "Professional" difficulty setting. So this trainer lets you max out your skills, adjust the game's difficulty settings, and even skip cutscenes or dialogues. It also features various cheats for getting through missions without killing anyone or raising suspicion-- so you can explore all of the game's missions without being harmed at all. And if you don't want to use the trainer and prefer to kill people without one, there's also a secret choice in the game that lets you do that too. The Hitman Absolution is not an easy game to play.
